

**SAMPO ROSENLEW**

## THE NEW PRODUCT FAMILY COMES OUT

**SAMPO ROSENLEW** is especially known about purpose-built logging machines for first thinning operations. Research and development work over a 20-year period has shaped the products to superior in many ways in its class.

**NOW IT IS TIME** to move to bigger logging sites. We will launch a totally new forest machine program for later thinning and clear

cut operations in FinnMETKO 2018 exhibition.

**OUR INTRODUCTION** will contain a brand new range of harvesters and forwarders which we will show you during exhibition days.

**THE NEW PRODUCTS** require investments to our services too. We develop our new Customer Care program simultaneously with our

new product range to guarantee compatibility of the machine and its service products.

**ONE OF THE KEY FACTORS** is availability of maintenance and service to machines. We are looking for service entrepreneurs to our service network.
